Portfolio

Volker is always observing and thinking about how design and its influence can be seen and felt in our everyday experiences, continually learning and developing problem solving solutions and skills in this ambiguous and sophisticated environment we inhabit. Volker's design vernacular is informed by using design thinking to understand complex challenges, to start creating, iterating, testing and evolving to make them feel simple, clean and intuitive yet realistic and tangible to the user and client.

Volker's approach is hands on, comfortable working in relatively flat and dynamic teams has a attitude of "give it a go" using 15+ years of human centred design experience spanning sectors across government, enterprise and academia. Volker's design fluency is diverse; from product launches, exhibition design, corporate collateral, interaction design, customer experience and brand strategy. Volker's digital knowledge, traditional design skills, strategic direction and co design methods provides a language for sectors across business to work together. Volker's work in Fintech, Health, Government, Architecture, Corporate while collaborative and empathetic uses a mindset to solve problems, to solve challenges through the language of design and design thinking.

This document presents a snapshot of work that spans diverse sectors, volkers expertise in design is integrated to support diverse clients needs. This ranges from Branding, UX, CX and supported by research when possible.

SmartHub

Global reach with one connection

Today, being able to trade efficiently is more critical than ever before.

With the SmartHub open trade messaging network, you'll be able to connect with market participants globally, reducing your point to point connections and costs.

- 500+ counterparties, buy and sell side
- Single connection, single certification
- Global, multi-asset, multi-currency
- Pre-trade, trade and post-trade messages
- Multiple message interfaces
- Highly resilient

SmartHub is a fully managed, cloud-based solution that interconnects with your existing systems, making it easy to trade. And with one connection, you'll be able to significantly reduce your IT footprint across message protocols while meeting your low latency requirements.

For further information, email: smarhub@iress.com
 Offices in: Australia, Canada, New Zealand, Singapore, South Africa, United Kingdom.

XPLAN
A market leading solution for licencees

Giving your advisers the best solution to deliver quality advice can go a long way to maintaining a valuable partnership.

With XPLAN you'll have a comprehensive, customisable solution with all the tools you need to grow your fund, service your practices and manage your risks. And the advisers in your network will have everything they need ... all in one place.

"We can offer our practices end-to-end support for advice delivery, business management and client engagement."

Easier ...

- Highly customisable
- Streamlines the way you and your practice work
- Makes revenue management easy and straightforward

Faster ...

- Supports advice delivery across your network
- Cuts administration time and lets you flex up your people
- Access on the go wherever, whenever on any device

Better ...

- Secure and reliable
- Enables strong risk management
- Helps practices in your network always keep pace with regulatory change

Dealer delivery | How XPLAN makes

The Challenge
The dealer provides the challenge. It's not just about getting a good product, it's about getting a good product that works. While the product is a good one, it's not always the best one.

The Solution
XPLAN is the only wealth management solution you need. It enables you to have it all in one place. It's the only solution that works. It's the only solution that works. It's the only solution that works.

XPLAN is the only wealth management solution you need.

XPLAN is the only wealth management solution you need. It's the only solution that works. It's the only solution that works. It's the only solution that works.

XTTOOLS
Simplifying complexity

Having the right tools to help your clients make their important decisions can add huge value and save valuable time.

Wider scenario modelling
XTTOOLS gives you powerful tools to perform a wide range of simulations and projections that you can easily update and compare using a range of different options and assumptions to your clients. This flexibility to present these probabilities or risks from one day's view.

Quicker reporting
Using XPLAN's Clear Focus module, you can efficiently create charts and tables for a statement of advice and with no double handling.

Single responsibility
The centralised XTTOOLS engine brings consistency to all your calculations and projections - key products for the responsibility of maintaining any in-house spreadsheets.

"One centralised system for consistent and accurate calculations and reporting."

XTTOOLS | The XPLAN difference ...

The Challenge
Advice practices who use XTTOOLS need to overcome their advisers' reluctance to use the product. IRESS ensures you always have current systems and the updates to produce your solutions are always accurate and complete.

The Solution
XTTOOLS gives you powerful calculation tools to help you give your clients the information they need. It does this with the consistency of diverse calculation systems, ensuring you always have current systems and the updates to produce your solutions are always accurate and complete.

Key features

- Clear and concise calculations
- Real-time updates to your clients
- Unlimited scenarios based on projections
- Simple and intuitive interface
- "What if" analysis
- Consistent and consistent outputs across your group
- Current rates and regulations
- Clear and easy to use
- Engaging client interface

XTTOOLS calculations

Investment	Savings, direct property, education funding, retirement planning, first home loan
Superannuation	Superannuation planning, transfer to retirement, pensions, super, pension vs lump sum
Taxation	Income tax rates, packaging, tax on EFT withdrawal
Insurance	Insurance needs analysis
CDR	Loan financing, debt consolidation
Lifestyle	Lifestyle goals
Compliance	Income support

For more information about XTTOOLS, call 01 521 5210 or email productmanager@iress.com or visit iress.com

Museums live through their visitors. muse is the voice of the visitor that inspires museums to create better exhibitions, programs and experiences. The muse seamless platform allows customisation directly to the ipad user interface. From a customisable backend to a well designed front end, muse provides a user-centred-design experience.

Brand Identity - Print - iShoU & WEF

iShoU WEF Tianjin Report
World Economic Forum, Tianjin, China,
"Annual Meeting of the New Champions"
26-28 June 2016

After WEF used iShoU as a test bed at Davos in Switzerland, the full iShoU system was implemented at the World Economic Forum, Tianjin in China. The system comprised of iPads that displayed collected data in real time on large LCD screens. This collected data was dissected, ported and turned into a PDF and print report.

Brand Identity - Print - JWA & NODEM

John Wardle Architects
Print collateral, branded items, Reports, Tenders.

NODEM Hong Kong
Conference Collateral

John Wardle Architects are one of the most respected "Design" architecture practices within Australia.

I was invited to design and create a identity and items for a leading international conference to be held in HK. The conference was to boost the professional persona for this new Department within City University in Hong Kong.

Volker's media design management knowledge was crucial to shaping John Wardle Architects brand. Volker was responsible for communicating the diverse facets of the practice to internal and external stakeholders.

SOLUTION

As the Conference items would be used across and range of items from a badge to a banner, the branded elements needed to have a strong identity of their own. Clean modern yet professional and strong. The Run Run Shaw building was used as inspiration for the main stylised element, blue, red green were used to bring out the three streams of the conference. Banners, Signage, programmes, screens were produced as required. It was a great success for the department improving the profile within HK and through the museums of the world.

As Brand custodian Volker has evolved the corporate graphics with the external graphic designers and help manage the media profile of a leading architectural design practice. As design manager he lead the team to develop strategy, design systems, content and projects like the intranet and new website. Internal branded items such as submissions, tender documents, competition collateral were also part of his responsibilities.

Brand Identity - Print - Corporate & Dental

Corporate and Annual Report clients where
Victoria Police
Yarra Valley Water
EPA Environmental Protection Agency
Ambulance Service Victoria
Melbourne University

smilegroup - Specialist Dental Service
Brand Identity, Interior Branding,
Signage, Promotional Items.

During my time at BBDA I was involved in the design and production of annual reports, performance reports and similar collateral. For over 10 years, I worked towards independently designing and producing the reports alongside the principal of the company.

Katherine Ngu is a respected specialist pediatric Dentist who was looking to start a new practice. The identity was a cautious move as conservative choices in this industry were commonplace. This specialist had to communicate to all three user groups, children, parents and the dental fraternity.

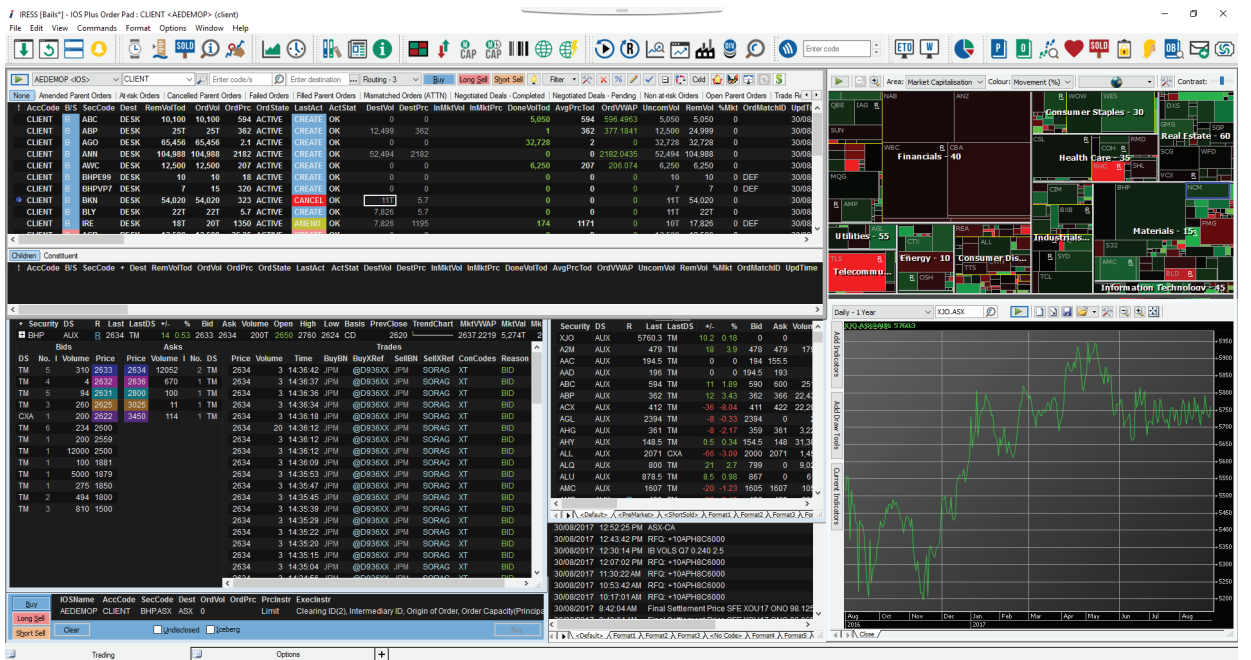

SOLUTION

In a digital age Annual Reports have to work with viewers small attention spans requiring maximum information. Ubiquitous information is vital and must express the brand, the content and the data.

Creating a branded icon that represented her three main clients, babies, toddlers and young boys and girls where key it the visual narrative. The notion was to have a happy, fun, and a inviting graphic would appeal to both markets. By using strong elements like the orange colour, type and pattern we were able to also convey the feeling of a clean, modern and professional practice. The identity has been well received both by clients, dental and hospital colleagues who refer young patients to her.

The reports were well received and the challenge for every year was to invigorate the brand, convey the data and bring information to the investor and or shareholder.

IRESS colour groupings, monotone, blue colour dark theme options, early flat tone ideas for icon redesign.

IRESS - Pro Facelift - UX Design
Windows Environment
Iconography - Toolbar - Login
540 Icons

UX Design, development and implementation, the key areas were Iconography and Toolbars, Usability, From the legacy windows top left, I was asked to input design thinking and usability ideas into improving the look and feel of the IRESS interface while working within limited and set program structures. This led to the incremental improvements above use of colour, tone, menu placements content areas.

Brand Identity - Print - Method Cards

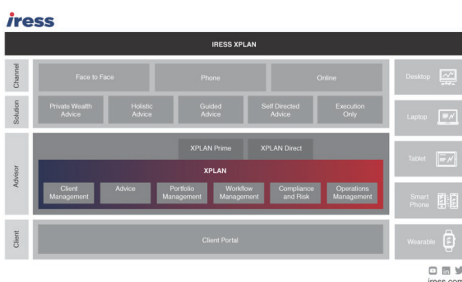

IRESS XPlan - Basic method card process

- > Pain Points to XPlan
- > Product managers drawn diagram
- > Card Process - process

While at IRESS the internal marketing management decided to call in all the senior product managers to workshop the future of the XPlan Product.

We proposed the use of a basic method card process and designed a default set so Product managers could, add, move, explore and order the future direction of the product. The process created the grid below.

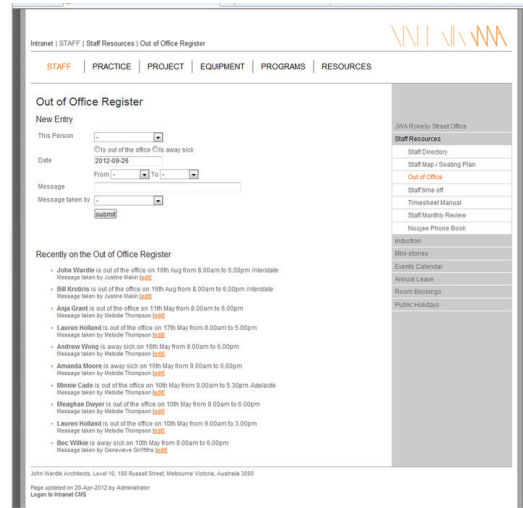

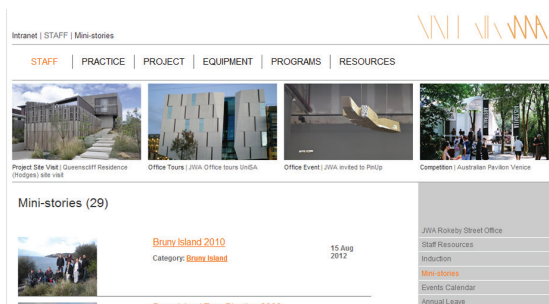

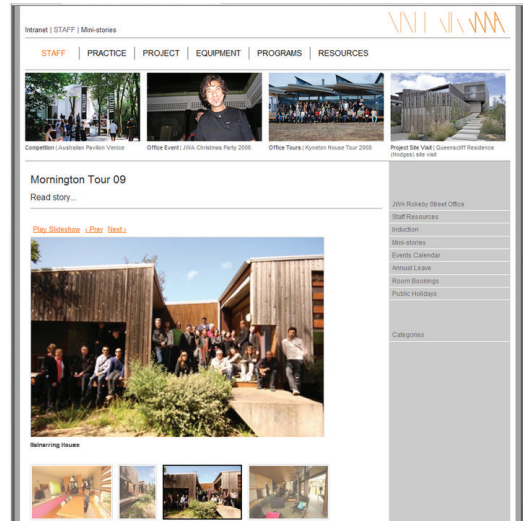

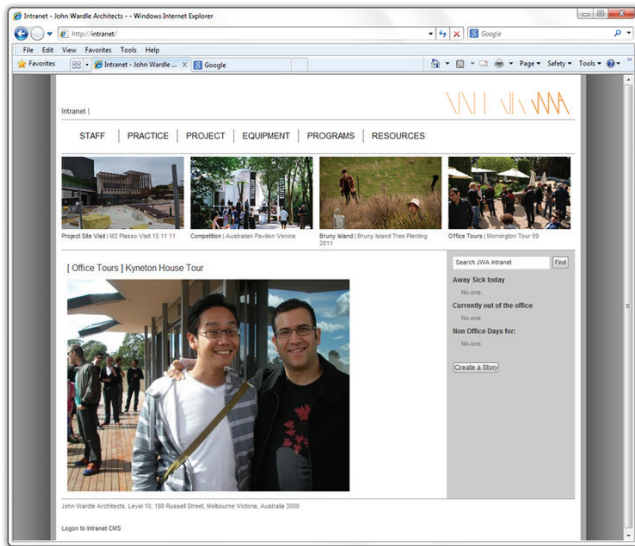

SDF - Branded persona cards

- > SDF branded "scenario" prompts
- > SDF Persona Cards

Swinburne Design Factory wanted some custom persona cards for their innovation workshops. These cards have been used in a variety of workshops with clients. At the conclusion of the workshops the clients are able to take away the method cards sets,

On the reverse side we collected and created a wide variety of SDF scenario prompts as reminders to the clients of SDF workshop processes, quotes, mantras.

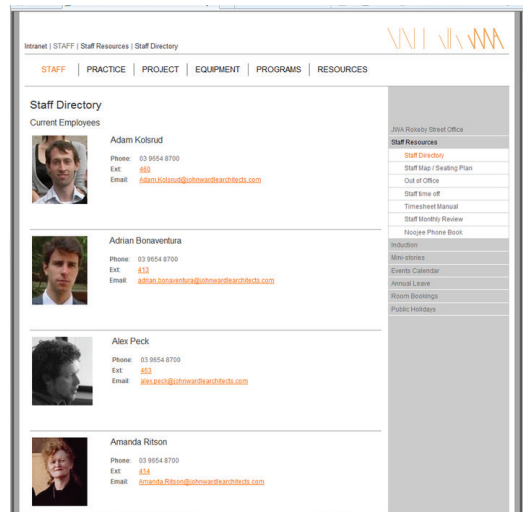

Brand Identity - Screen - JWA simple intranet

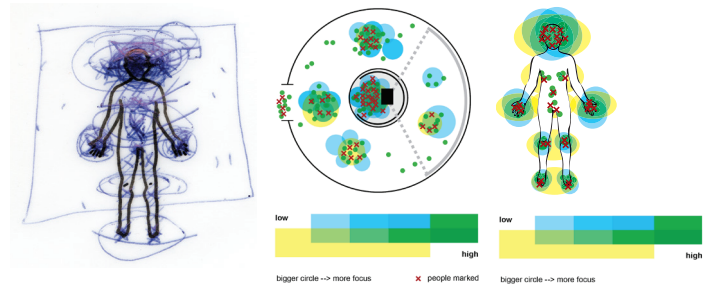

John Wardle Architects
- Intranet

John Wardle Architects required a central repository of commonly used information for all the staff to use. The existing structure presented a series of items such as drives, data and assets haphazardly. Information was parked across multiple drives and folders making the task to find certain information less than ideal. There was also no ability to track usage or easily update assets.

I proposed an investigation with a small working party to establish needs of a busy architectural practice. We also engaged a programmer for a active custom made CMS. Specific demands of JWA employees were considered such as; a simple staff directory, seating plan for new employees, "out of office", booking equipment, leave tables for both a single worker, or internal teams, in office social events, site visit social stories and galleries.

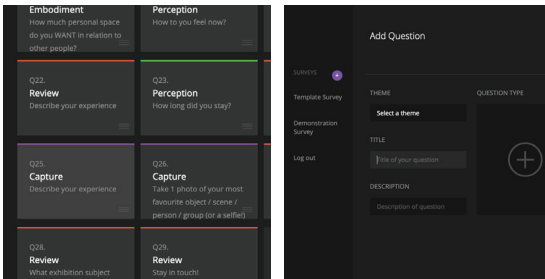

Brand Identity - Screen - iShoU

Overlay of paper survey data into combined drawn diagram

Mapping of paper survey data into digital diagrams

Eventual Digital survey integration of past research investigations.

iShoU

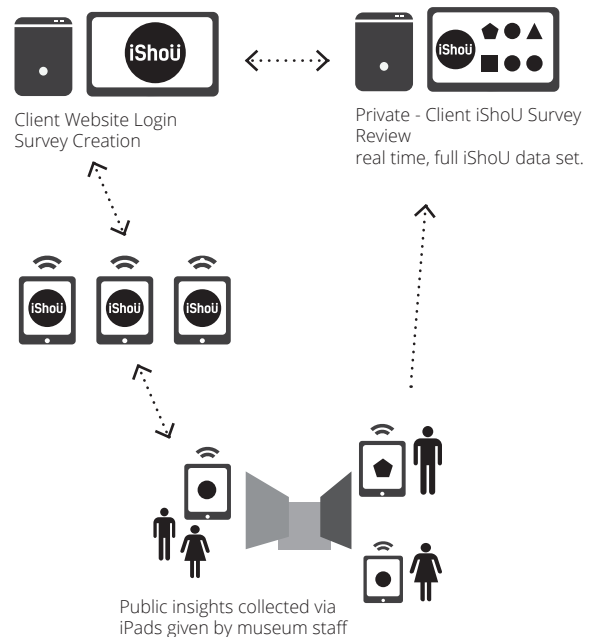

Visualising people's experiences

There has been a need for museums to analyse and quantify their exhibition spaces. iShoU engages with people helping them understand and articulate their experiences. iShoU creates a 'pulse' of users responses, dynamically aggregating, analysing and visualising this experiential data.

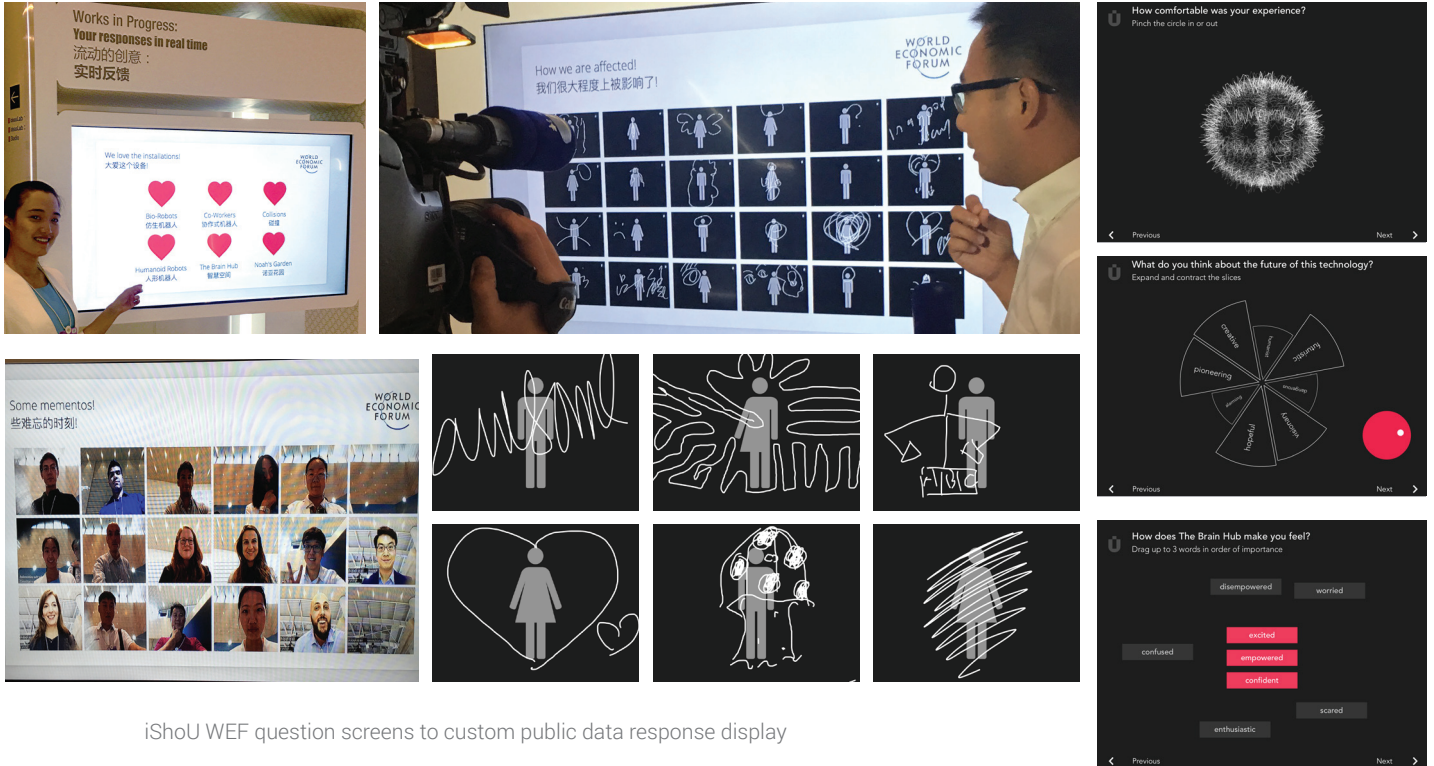

- Create - Create and manage surveys for multiple activities online
- Collect - Visitors participate and complete the surveys interactively
- Visualize - Learn qualitative responses through visual data

iShoU - Ways of Interaction
<http://www.ishou.com.au>

Brand Identity - Screen - iShoU & WEF

iShoU WEF question screens to custom public data response display

World Economic Forum, Tianjin, China, Annual Meeting of the New Champions 26/28 June 2016

Across the exhibition, there were 437 participants who responded to the iShoU survey, with a small majority (56%) represented by Chinese speakers. The gender breakdown was 52% male, 45% female, 3% transgender with an average age of 34.

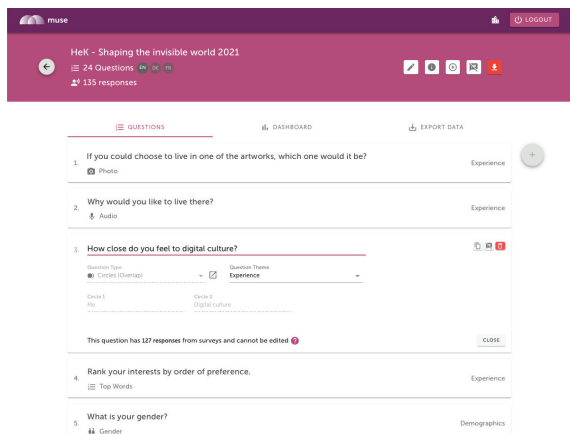

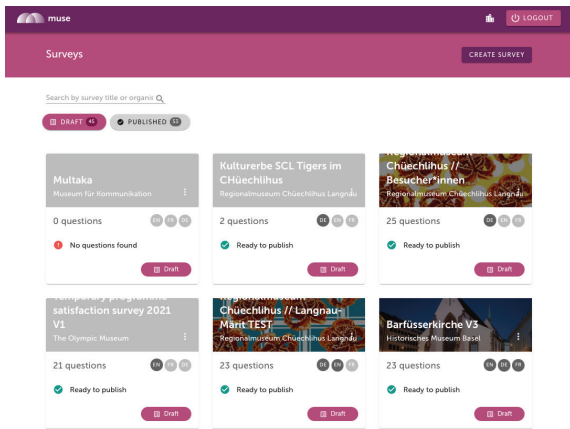

On average, the respondents found engaging with the respective installations was 'blissful' (79%). The top-ranked word associated with how the various installations made respondents feel was 'excited' and the average that an installation changed a participant's mindset about technology was 66%.

When asked to express themselves how the installation affected them through drawing on a picture of a body, respondents drew images that can be broadly classified into the following types:

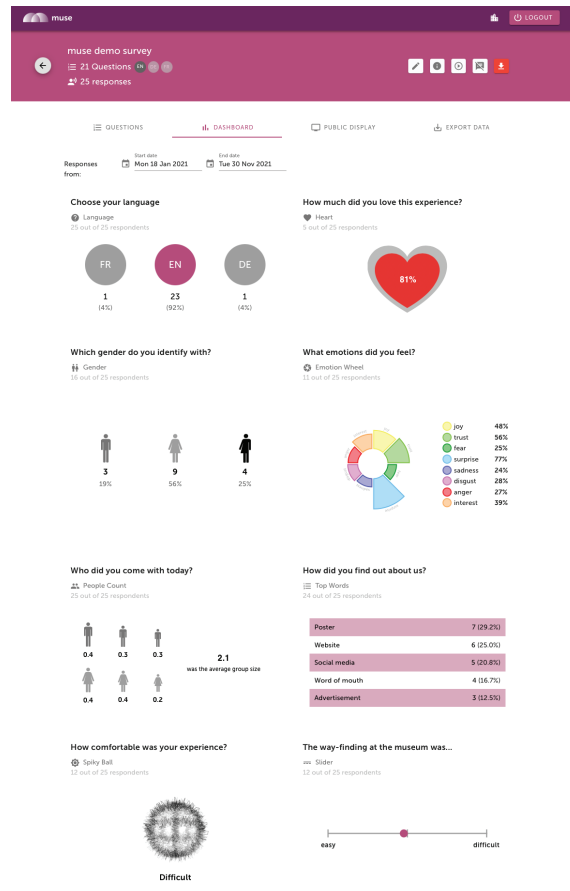

- > Body augmentation
- > Emotional expression
- > Freestyle
- > Annotation (written words)
- > Environment

The top-ranked word associated with the future of technology was 'creative'. On a Likert Scale of negative to positive respondents ranked emerging technologies as 56% positive. Respondents reported they trust nature more than technology (70%).

Brand Identity - Screen - muse

above, survey admin below, survey questions

muse client side survey data dashboard

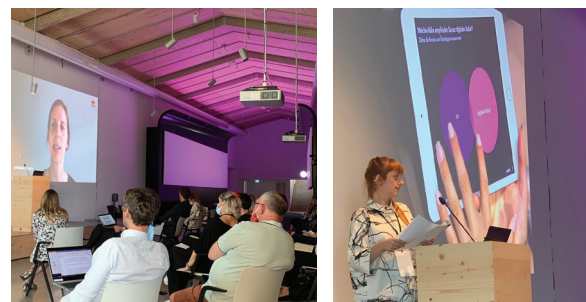

muse - the voice of the visitor
 EPFL Lausanne Switzerland
<https://muse.stream>

Muse has evolved from iShoU directed toward museums and the specific needs of that client base. Engaging in a design-led approach through established interaction and data insights muse has facilitated the development of a responsive human centered tool to include the 'voice of the visitor' at the center of museum strategy (visitor-led as opposed to expert-led). The muse seamless platform allows customisation directly to the ipad user interface. From a customisable backend to a well designed front end, muse provides a user-centred-design experience. muse 16 core partner museums expressed their views and experience of muse at this first stage in the project. The current "love factor" for muse is quite high (84%). The top 4 words you chose to describe muse were 'playful', 'innovative', 'engaging' and 'insightful' and you identified a large overlap between the user-centered-design and the scientific robustness of muse (73%).

Brand Identity - Screen - muse

muse ipad client

muse ipad in the field - AlUla, Saudi Arabia

muse

the voice of the visitor

<https://muse.stream/en/>

Engaging in a design-led approach through established interaction and data insights muse has facilitated the development of a responsive human centered tool to include the 'voice of the visitor' at the center of museum strategy (visitor-led as opposed to expert-led).

muse was born out of a need to provide a service and a tool for museums to better understand their visitors as central to museum dialogue between directors, curators, education, marketing and production teams. muse aims at revealing both new ideas and unexpected connections across time and within a museums exhibition spaces and curated cultures. The muse tool and it's framework helps devising effective strategies for encouraging visitors to become active participants in culture, fostering social change.

Testing in the Desert, AlUla

The employment of narrative, metaphor, game, interactive, participatory technologies are utilized to organize our more abstract understandings of our experiences by patterns, images, drawing and other user led actions in the space and in the moment.

A major test was during a premier event called Winter at Tantora in Saudi Arabia that required multiple surveys (Arabic/English) deployed at different cultural installations, public, historical, music.

This test was during a twelve-week festival running from 19 December 2019 until 7 March 2020 organized by the Royal Commission for AlUla (RCU).
